RIDE BEYOND THE HORIZON

RIDE INTELLIGENTLY

Where water meets freedom. Feel the rush. Hear the wave. Live the moment and beyond.

RIDE BEYOND THE HORIZON

THE BRAND

AZTRON is all about passion for sports, challenge yourself and connect with nature. With mountains and oceans as our playgrounds, we set out to explore the unknown—and discovered a community of like-minded adventurers along the way. We constantly break boundaries, challenge ourselves and set the new definitions. From paddling to surfing, from skating to wing foiling, we create watersports gear that is smart, safe, innovative and uniquely designed. We never stopped pushing the limits. With the passion and love, we're excited for what's next.

OUR MINDSET. OUR PURPOSE

The name AZTRON is derived from Astro, symbolizing the mystery of the universe and the spirit of infinite possibilities. It embodies our commitment to diversity—in both mindset and design. For the new season, our purpose remains the same: to make it as easy as possible for everyone to get started. Our deepest ambition is to develop the very best products for this fascinating sport. Many of our innovations are designed to enhance safety and make the experience more accessible for all. Our mindset, as always, is to embrace every moment on the water—uncompromising and full of passion.

BEHIND THE DESIGN

As a company, we believe in Ride Intelligently as our brand credo. Our innovative Double-Chamber air paddleboard technology ensures safety for all riders. From material and technological breakthroughs, our team thoroughly analyzes first-hand feedback and continuously explores innovative solutions and design concepts to push our products to the best possible stuff in the market.

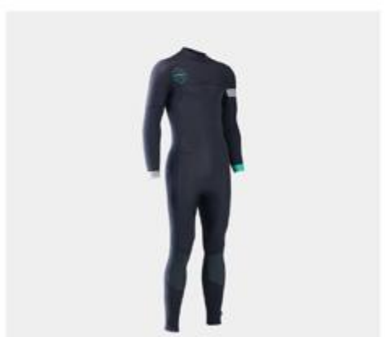

ONE COMMUNITY

We are more than just a watersports brand - we are a community of innovators and adventurers, united by an unyielding desire to explore the unknown. Our Aztronauts (Team Riders) are the beating heart of AZTRON, enriching each of our experiences through moments of growth and a deep appreciation for the world we explore together. Join AZTRON and become part of the global Aztronauts community. Together, we'll unlock our full potential and tackle every challenge head-on.

BEST SELLERS

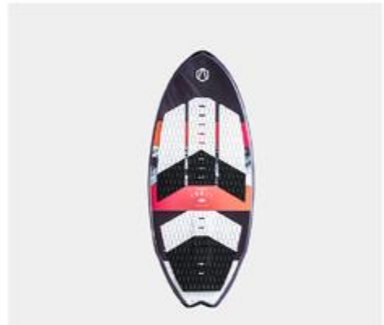

FROM THE THRILLS OF CATCHING WAVES TO THE SERENITY OF PADDLING AT SUNRISE, THE RIGHT GEAR MAKES EVERY MOMENT ON THE WATER UNFORGETTABLE. OUR BEST ARE TRUSTED BY BEGINNERS AND PROS ALIKE – A HANDPICKED COLLECTION OF PERFORMANCE – DRIVEN, DURABLE, AND ADVENTURE – READY ESSENTIALS.

Meet The Riders

United by water, defined by adventure. Our team is made up of seekers—fearless individuals who chase waves, speed, and the thrill of the unknown. From sunrise sessions to high-adrenaline races, they ride not just for victory, but for the freedom and discovery that only the water can offer. They are explorers of tides, masters of motion, and storytellers of the sea—pushing boundaries, inspiring others, and proving that every wave is an opportunity to rise higher.

SUSTAINABLE FUTURE

At AZTRON, we are more than just a brand. We are a community of responsible adventurers who care about the environment. We know that our actions have consequences, and we are determined to make a positive change for our planet. That's why, for every season, we are launching a series of initiatives to reduce our environmental impact and protect our oceans and beaches. Continue with our mission, this season we're not only using recyclable paper inside the SUPpackaging but almost fully switch to yellow carton packaging for all of our inflatable and composite boards to protect the ocean. Every change matters, and our new packaging is 100% recyclable and eco-conscious, reducing plastic waste that can harm marine life. By choosing our products, you're helping safeguard the ocean while enjoying sustainable, stylish packaging.

RECYCLABLE PACKAGING

At AZTRON, we're deeply committed to saving our planet one step at a time. To combat the environmental damage caused by plastic, we're transitioning to eco-friendly packaging for most of our Inflatable and composite boards. Farewell to plastic bags, we're welcoming recyclable paper packaging. Plastic's slow decomposition, ocean pollution, and harm to wildlife are well-documented. Paper, on the other hand, is biodegradable, renewable and easily recyclable. By switching from plastic bags to paper packaging, we are taking a step towards a more sustainable future.

BEACH & OCEAN CLEANUPS

Our next step unfolds: launching beach and ocean cleanup initiatives. We believe that every piece of litter we remove from the shore is one less piece that can harm our aquatic ecosystems. We are dedicated to educating our customers and partners on the importance of proper disposal and recycling of waste materials. By joining our beach cleanup projects, you can help us transform plastic and other debris into useful products, while protecting our oceans and beaches from pollution. Together, we can make a difference and protect the beauty of our planet for generations to come.

REDUCE CARBON FOOTPRINT

We recognize the detrimental impact of carbon emissions on our environment, which threatens the health and well-being of all living beings on Earth. To combat this, we wholeheartedly encourage our employees and partners to reduce their carbon footprints by using more eco-friendly transportations. We believe that every action counts, whether it's opting for public transportation, walking, biking, or driving electric cars, each choice contributes to a cleaner, greener future. Join us in our mission to create a positive impact on our planet and secure a brighter future.

INFLATABLE
BOARDS

INFLATABLE BOARDS TECHNOLOGY / MATERIAL AND STRUCTURE

	AIR COMPACT RANGE	TOURING/SPECIALTY RANGE	ALL-ROUND RANGE	RACE RANGE
OUTER PVC SHELL	**DURABLE AND LIGHTWEIGHT** Single layer reinforced PVC outer shell.	**DOUBLE LAYER FUSION** Top and bottom of the boards is directly machine heat laminated to the drop-stitch core with high density PVC under controlled conditions. The result gives an ultimate quality, stiffness, bonding and light-weight material. The overall stiffness is increased by 30%.	**DURABLE AND LIGHTWEIGHT** Single layer reinforced PVC outer shell	**DOUBLE LAYER FUSION + CARBON INLAY** Top and bottom of the board is directly machine heat laminated to the drop-stitch core with high density PVC under controlled conditions. The RACE range is built with a 3K carbon rail and inlay to further strengthen the outline and rigidity.
DROP-STITCH CORE	I STITCHING I-Stitching Drop-Stitch core is a standard knitted support fabric with thousands of polyester threads create a super strong and high pressure inflatable material.	X STITCHING X-Stitching Drop-Stitch core applies on the All-Round, Touring and Race iSUP is an advanced weave pattern provides a unique structure for the polyester yarns. The X-Stitching core offers good strength, and its new weave pattern contributes to lower overall weight by 20% and better flexibility.		
DOUBLE CHAMBER CONSTRUCTION AND AIR DISTRIBUTION				
	• Inner and outer chamber offers 30:70 air distribution • Gives 60L extra buoyancy of total board floatation	• Inner and outer chamber offers 50:50 air distribution • Gives at least 150L extra buoyancy of total board floatation	• Inner and outer chamber offers 50:50 air distribution • Gives at least 150L extra buoyancy of total board floatation	• Condensed air distribution • Gives 90L extra buoyancy of total board floatation
ISUP MODELS	• NOVA • SUPER NOVA	• TERRA • URONO • NEPTUNE • VENUS • POLARIS • SOLEIL • SOLEIL XTREME • FALCON AIR	• LUNAR • MERCURY • TITAN	• METEOR

DOUBLE CHAMBER, DOUBLE SAFETY

Built with two separate air chambers, the AZTRON Signature and LITE dual-chamber construction offers a 30:70 or 50:50 air distribution between the inner and outer chamber. The second chamber offers a secondary floatation for any emergencies while the sidewalls act like I-Beams make board stiffer. The inner chamber is wisely positioned at the standing area and continuing towards the front. This effectively reduces the deflection about 1.5-2cm comparing to other inflatable SUP in the market.

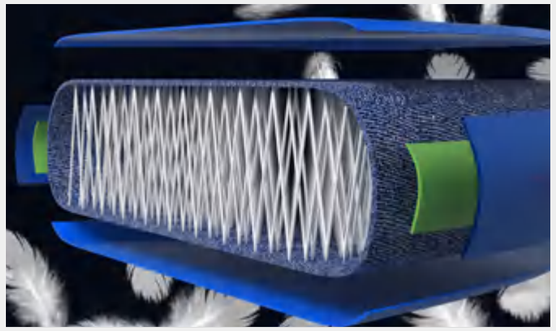

CUSTOMIZED DOUBLE VALVES

All AZTRON's inflatable SUPs are equipped with customized high pressure valves specially designed for the Double Chamber construction. With a relative smaller diameter than regular air valve, the unique AZTRON valve allows you to prevent damages caused by over inflation. The performance yet is not compromised by this special design.

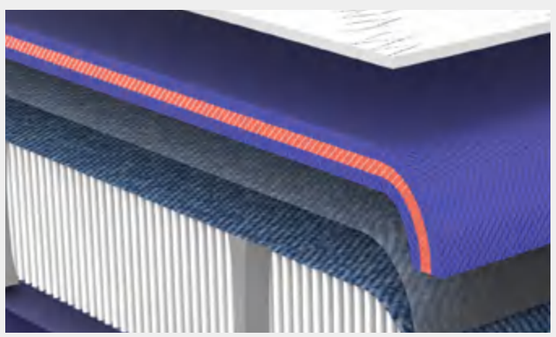

PREMIUM DROP-STITCH CORE

The drop-stitch core is the heart of every AZTRON inflatable SUP. The core is built with two pieces of polyester knitted support fabric with thousands of fine polyester threads. Each base material is about five to ten feet in width about approximately 400 needle heads per piece to finish the setup. Each needle sews a continuous and evenly spaced thread, back and forth between the top and bottom base fabric, locking them into an incrediblly strong unit. This innovative process creates a super strong inflatable material.

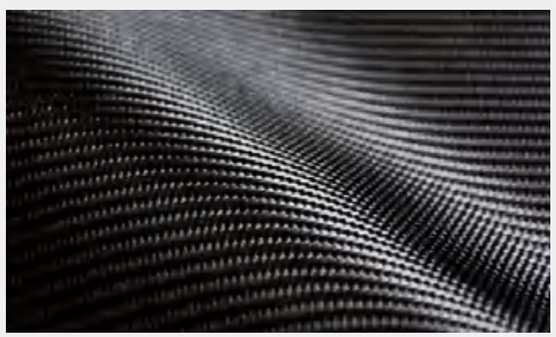

LIGHTWEIGHT, YET BUILT TOUGH

AZTRON's woven X-Stitching drop-stitching technology provides a advanced structure of the polyester yarns. The new weave has a unique and less knitting method than the traditional I-Stitching. This gives the board more strength, yet not compromising the board stiffness and helping to reduce the overall weight by at least 20%. We applied the Ultra-Light drop-stitch core on the All-Round touring and Race Range.

DOUBLE LAYER FUSION PVC OUTER SHELL

The Double Layer Fusion Tech is our premium construction. Featuring a second PVC layer, which is machine welded directly to the drop-stitch core and around the I-Stitching or X-Stitching material. The benefits of the Double Layer Fusion construction when compared to the standard Double Layer Glue construction is a 20-25% reduction in overall weight, and around 25-30% increase in stiffness. Simply the best inflatable technology out there!

CARBON BAND LAYER

A new 3K Carbon Band layer is applied on the deck area of the RACE SUP - METEOR and METEORLITE. The innovative Carbon Fiber extra layer offers additional stiffness and performance to the competitive range.

SUPER NOVA 11'0"

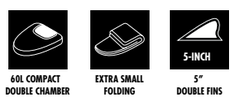

COMPACT / TOURING

Meet the new Compact Board collection, the smart foldable paddleboard – lightweight, compact, and ready to go anywhere. Designed to fold down small but open big on performance, it's your travel companion for spontaneous rides, weekend escapes, and water adventures without limit. This season, the lighter tone makes folding mark less visible, while the new seat D-ring option brings added versatility for every ride. With the Double Chamber design, this board is built for both confidence and adventure.

A NEW ERA OF PADDLING FREEDOM.

Aztron's flagship NOVA and SUPER NOVA make innovation in a fold. This compact, smart-designed air paddle board redefines freedom on the water – folding down into a half-size of regular SUP without compromising speed, stability or strength. Engineered with advanced air-core technology and intelligent design details, it is the ultimate board for explorers who want flagship performance in a portable form. Now, you can ride anywhere from Backpack to Board in minutes.

MERCURY3.0 10'10"

ALL-ROUND

The all-round hybrid SUP range blends performance, style and portability with an eye-catching graphic design. Engineered from advanced double-chamber tech and ultra-light drop-stitch core, it's easy to carry while still offering durability and safety on the water. It's hybrid outline with a micro-tip nose delivers the best of both worlds – better surfing capabilities with fast tracking. Designed as an all-rounder, it glides smoothly for leisure paddling, fitness, or exploration, making it ideal for both entry-level or advanced riders. With the unique eco-friendly artwork, this board stands out as a both high-performing paddle board and a statement piece for every adventure.

METEOR 14'0"

RACE

Awaken your competitive spirit with the refined METEOR 14’0”. Equipped with Double-Double Technology and a streamlined profile, this board delivers powerful strokes with precise tracking. The latest version gives a narrower profile and lightweight construction, while retaining key race-ready features such as 2+1 race-style handles, tail kick pad, optimized rocker for smooth water flow, and a pointed nose for cutting through waves. Built with Ultra-Light double layer x-stitching core, it delivers a 20% lighter board for competitive paddlers and efficiency over long distances. Designed for professionals ready to turn ambition into reality, the METEOR is your ultimate race board.

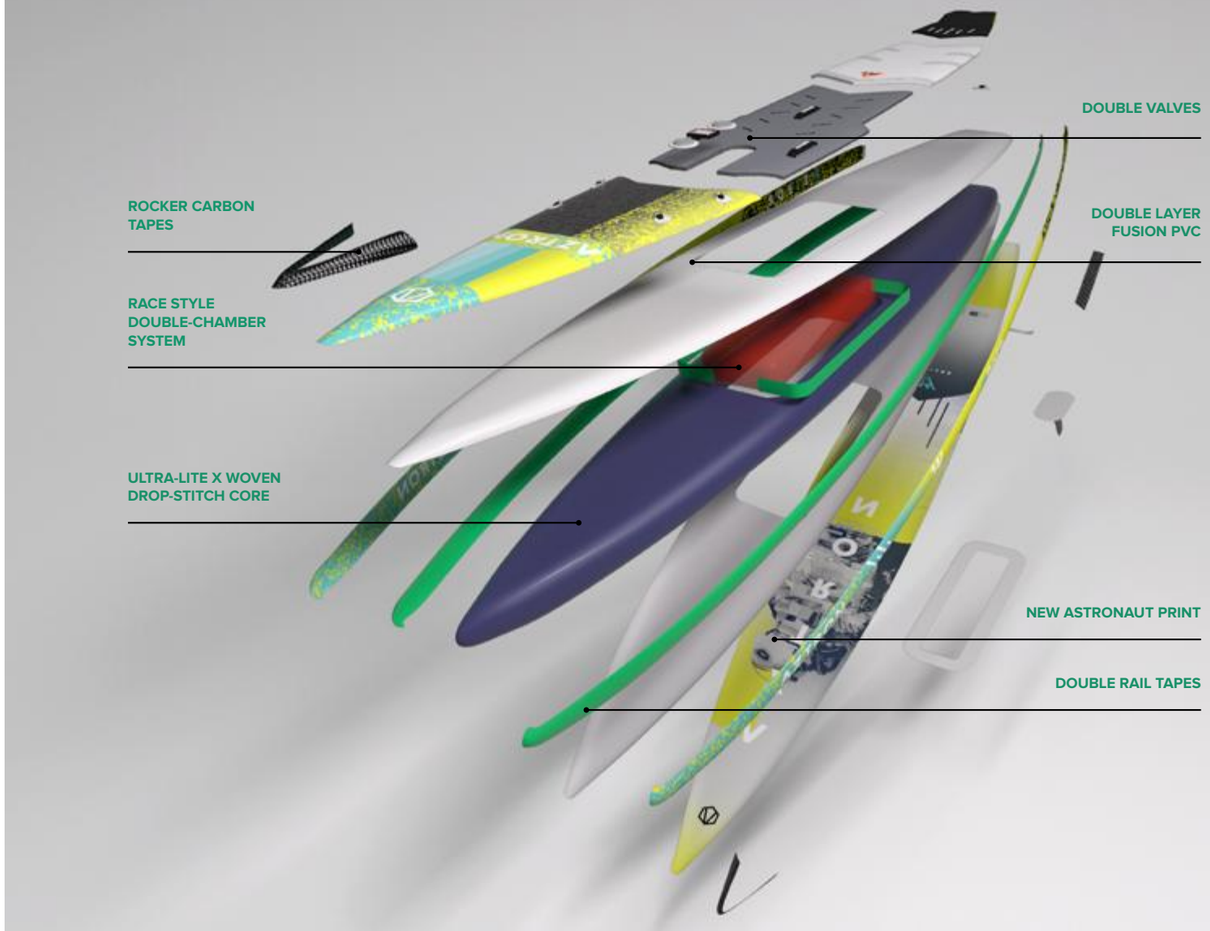

SPECS/

ITEM NO.	*AS-650WD*	**VOLUME**	315 L

RACE TECHNOLOGY

HIGHLIGHTS

> Updated board outline to offer best performance and maneuverability
> Narrowed deck from 27” to 26”
> Flatter tail design and raised side EVA pads for extra stability and helpes recover balance with the EVA footpad to push against
> Stiffer rocker carbon tape allows for significantly better up water diving ability
> New concept of Aztron Race range visual and customized astronaut print

The METEOR 14’0” offers a more performance-oriented shape, with a slimmer deck and a narrow yet flat tail - feature silicon rail edges to increase top speed and maximize gliding efficiency. The Aztron signature Race Double-Chamber construction guarantees extra generous buoyancy and ultra stiffness. The Double Layer Fusion premium material technology ensures METEOR is rigid and direct on the water, with a raised center try for super stable stance. Ideal for either flat water or down-winds on open ocean. They are faster than most of the race boards.

UNLEASH POWER, SPEED, AND CONTROL-THE ULTIMATE WING FOIL EXPERIENCE

Wing foiling has became one of the most exciting and rapidly growing sports in recent years. It is currently the biggest driver of innovation, because it's still a young sport that is growing all over the world. The future looks incredibly bright. For the new season, AZTRON introduced three innovative boards covering from Mid-Length to Down Wind, and a brand-new Air Wing with upgraded profile and fixed carbon handle to achieve higher speed, better stability and the overall aerodynamics. With all the advancements in design, materials, and technology, we're aiming to make the sport more accessible, exciting, and versatile. This is the super exciting time because you'll feel the big differences and our improvements from year to year.

MIDL 6'10"

MID-LENGTH / FOIL / WING

LENGTH	4'2" / 127 cm
WIDTH	19" / 48.26 cm
THICKNESS	1.5" / 3.81 cm
VOLUME	35 L
MATERIAL	- Pre-preg carbon - Bamboo veneer - Epoxy

FALCON SOFT TOP 5'7"

FOIL / WING / SURF

SPECS/

ITEM NO.	*AH-510SF*
LENGTH	5'7" / 170 cm
WIDTH	28" / 71 cm
THICKNESS	3.5" / 8.8 cm
VOLUME	92 L
MATERIAL	- EVA foam - Epoxy

FALCON CARBON X 5'0"

FOIL / WING / SURF

SPECS/

ITEM NO.	*AH-215F*
LENGTH	5'0" / 152 cm
WIDTH	26" / 66 cm
THICKNESS	4.3" / 10.9 cm
VOLUME	75 L
MATERIAL	- Pre-preg carbon - Epoxy

HIGH ASPECT FRONT WING BUILT WITH HIGH DENSITY FOAM, FIBERGLASS, SHIELD SKIN AND CARBON PLY.

ROCKET MAST GIVES AMAZING STABILITY AT HIGH SPEEDS.

HIGH ASPECT REAR WING. SPAN 310-320CM

60-78CM FUSELAGE BRINGS STABILITY, CONTROL AND CONFIDENCE.

ALUMINUM MAST BASE.

The ***ROCKET FOIL*** collection benefits from a popular outline, higher aspect ratio and surfaces to privde a fantasitc and thrilling glide, a progressive and easy take-off, and increased low-end potential. The pre-preg carbon ply integrated into the construction, hence increasing their resistance and stiffness for even more control and stability.

AIR MIDL 7'0"

FOIL COLLECTION

Elevate your wing foiling ride with our newest MIDL Air 2026, the innovative inflatable Wing Foil board that combines the efficiency of a downwinder with power and stability, Perfectly designed for freeride enthusiasts, the MIDL Air strikes the ideal balance between performance and lightweight handling. Offers a travel-friendly, alternative to our composite carbon foil board.

SPECS/

ITEM NO.	*AS-700F*
LENGTH	7'0" / 213.4 cm
WIDTH	25" / 63.5 cm

RADIUS

Meet the new RADIUS Air Wing – your ticket to next-level performance. The ultimate wing for freestyle and wave riding, now in a Fixed Boom design! Designed to take off early, accelerate rapidly, and launch you higher than ever, RADIUS brings more power and fluidity in wing foiling and especially surf-freestyle. Aiming for explosive power and unmatched control, the new wing shape with a compact outline, offers improved Low Ration that leads to quick take off, strong forward traction and high radial in moves. Moreover, introduce the 1-piece Fixed Boom Technology that delivers significant weight reduction and allows rider to maintain and adjust the power as needed. Whatever the conditions, this wing pushes your limits and redefines what's possible on the water.

AIR WINGS

Designed to make foiling more effortless than ever! The The AIM and SOAR air wings are created specifically for all level riders who pursues for stable and effortless drift. With improved wingspan and design technique, it surely delivers a smooth and fun ride. Using the latest version of Ultra-Light canopy and reinforced tapes on the rails sets a whole new standard in lift, flex and response. For all those new to the world of foiling, spread your wings and enjoy the taste of freedom!

TECHNOLOGY

NEW MID-LENGTH AND DOWNWIND 2026

Introducing the new season Mid-Length and Downwind foil board- where cutting-edge materials meet next-level design. Built with pre-preg carbon construction for unmatched stiffness, ultra-light weight, and explosive responsiveness, these boards are engineered to accelerate quickly, maintain effortless glide, and deliver smooth, controlled take-offs. The mid-length shape strikes the perfect balance between stability and agility, giving riders more power across all conditions. Whether chasing endless downwind runs or pushing the limits of foil performance, Aztron boards are ready to elevate every session.

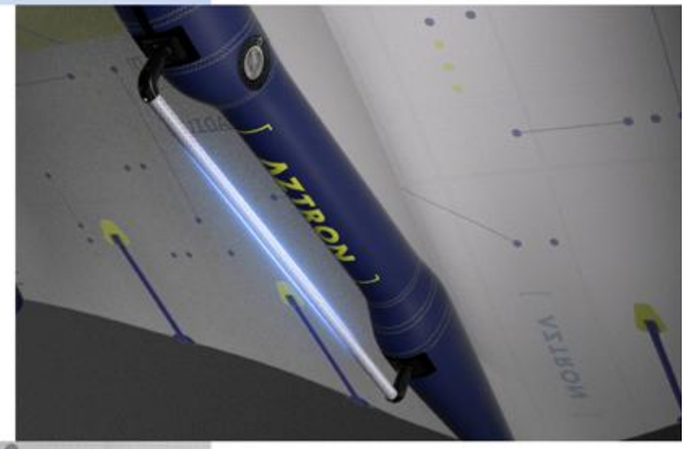

MORE LEVERAGE. MORE CONTROL

The Long Carbon Foil tracks are here. The new design features a lighter and longer carbon foil boxes for significant weight saving and increased adjustability.

WINGPRO X-CARBON BOOM EDITION

Meet the next evolution in Wing Design-the Air Wing with Carbon Boom. Built for riders who demand percussion and power. The new Fixed Handle delivers an unmatched stiffness, lightning-fast response and direct connection to your wing. The result is more efficient pumping, sharper handling and smoother transitions, all while keeping weight to a minimum. Whether chasing speed, lift or control, the new handle design elevates your ride in every condition.

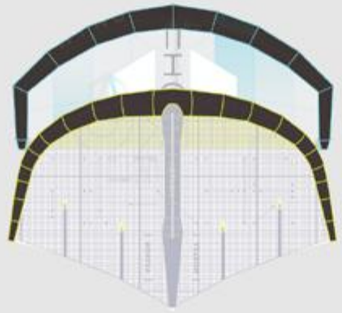

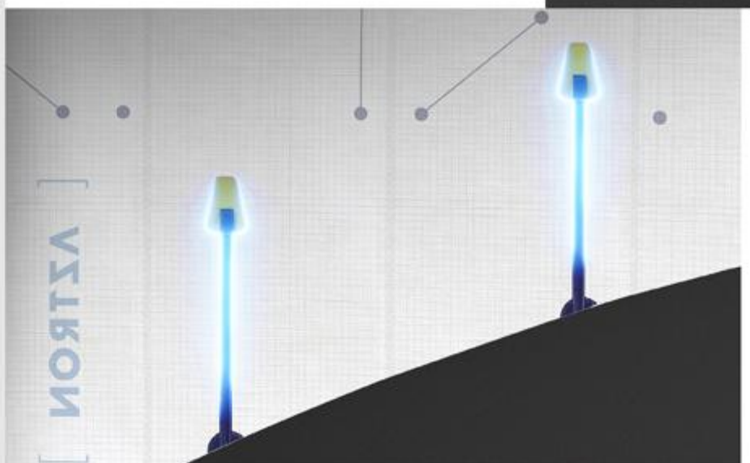

CARBON FOIL

AIR BOARD

SHAPE EVOLUTION

WING

REINFORCED FIBERGLASS BATTENS

Stronger Canopy. Sharper Power. Strategically integrated into the canopy, these fiberglass battens add rigidity and structure, helping the wing hold its shape under load and deliver consistent power across all wind conditions.

ROCKET FOILS (HP)

The ROCKET High Aspect range 1450H and 1800H are full carbon high performance foils designed to be the fastest and most efficient foils for upwind and downwind. The 1450H offers a higher aspect ratio front wing, combined with a more powerful profile ensures maximum efficiency. Here comes the foils that granting more sky time and more display of impressive tricks.

ROCKET FOILS

The ROCKET 1650 and 2000 show incredible maneuverability and maximum stability at high speed, making it a true companion for the riders in the early and progressing foiling stage. The fuselage and base plate were re-engineered. Combined with the advanced prepreg carbon construction, the overall setup promises the lightest combination with maximum of control and highest speed. As the larger size in the range, the ROCKET 1650 and 2000 guarantee great stability and a smooth and comfortable riding experience.

	RACE RANGE	TOURING RANGE	ALL-ROUND RANGE	SOFT-TOP RANGE
OUTER SHELL	CARBON INNEGRA · CARBON SANDWICH TECH · EPOXY RESIN	EPOXY RESIN · BAMBOO TECHNOLOGY	EPOXY RESIN · BAMBOO TECHNOLOGY	IXPE · HDPE SLICK BOTTOM
	CARBON + EPOXY RESIN The AZTRON composite RACE SUP range is built with premium innegra and pre-preg carbon shell. It is layered and reinforced with strategically placed fiberglass and PVC reinforcements. The strength to weight ratio is perfect as a result. The RACE board range is positioned as high performance board which is super lightweight, stiff and the top of the range.	**EPOXY/BAMBOO FINISH TECH** The Touring board collection is applied with an exceptionally durable construction with a great weight to strength ratio. Created for frequent use, the fiberglass layers and reinforcements ensure optimum stiffness. A thick, durable outer skin gives the board extra strength, as well as impact resistance. The bamboo veneer applied on the EUROPA is not only natural source, it also brings superior tracking, unique flex response and optics.		**LIGHTWEIGHT YET DURABLE** The shock absorbing Soft Top shell is applied onto our ECLIPSE all-round SUP and surfboard range. The lightweight construction is ideal for frequent riders. Combined with strategic use of glass reinforcement ensure adequate stiffness, while the strong and thick outer skin gives the board's hull strength. With the extra ding and impact resistant, the Soft Top tech gives riders a user-friendly comfortable deck.
CORE MATERIAL	CNC EPS FOAM CORE CNC shaped lightweight EPS foam core. The medium light density (20KG/M³) core is wrapped with carbon or epoxy resins.		HD-EPS CORE WITH STRINGERS CNC shaped lightweight EPS foam core at medium density of 20KG/M³. Wooden stringer for flex and rigidity.

CARBON KEVLAR

Carbon Kevlar is our high-end technology for our performance composite boards. It contains 100% 3K twill weave carbon fiber that delivers excellent balanced weight, strength and impact resistant characteristics. The lightweight 100g carbon is laminated over the standing area and full bottom. The stronger 150g carbon wraps the nose, rail and the gives the best strength ratio and efficient flex.

CARBON SANDWICH TECHNOLOGY

Aztron Carbon Sandwich combines the superior strength and stiffness of carbon fiber and PVC foam. This advanced construction delivers the highest-performance race paddle board with top characteristics.

NATURAL BAMBOO VENEER

Bamboo has the highest strength to weight ratio of any natural fiber. It is a light weight material and remains extremely buoyant while under weight. The bamboo material makes a durable and fluid ride. It is also eco-friendly since bamboo grows strong and rapidly over a short amount of time.

UNI-DIRECTIONAL EPOXY GLASS

The Epoxy Glass is used in most of our composite boards. This advanced material features 4 to 6 oz. of uni-directional glass fiber for extra strength in various water conditions. Unlike the multi-directional short glass fiber, the uni-directional epoxy works continuously along its uninterrupted length to provide stiffness. Oriented at 45 degrees, the epoxy resin makes the board stiff but still flexible.

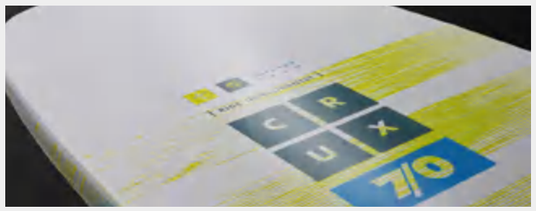

SUPER LIGHT EPS FOAM CORE WITH WOOD INSERTS

Expanded Polystyrene (EPS) is a light weight cellular plastic material consisting of small hollow spherical balls. The material features extremely lightweight and increased buoyancy and floatation. Most of our boards are constructed with a medium density (20kg/m³) EPS core and premium plywood stringers to deliver a lighter, yet stronger board that feels fast and responsive.

IXPE DECK

The IXPE material we've applied on the Soft-Top surfboard range and bodyboards is a higher density material. The advantage of IXPE is that due to its high density, it effectively adds rigidity and enhances the overall strength of the board. It also provides superior water protection to the surfboard or bodyboard and gives rider a smoother riding surface.

HDPE SLICK BOTTOM

High Density Polyethylene (HDPE) is a stiff slick back layer on the bottom of the soft-top surfboard range and bodyboard. Not only does HDPE slick add strength to the board, it also delivers a resistance free riding surface to enhance the performance characteristic, such as speed, agility and overall maneuverability on the wave.

RACE

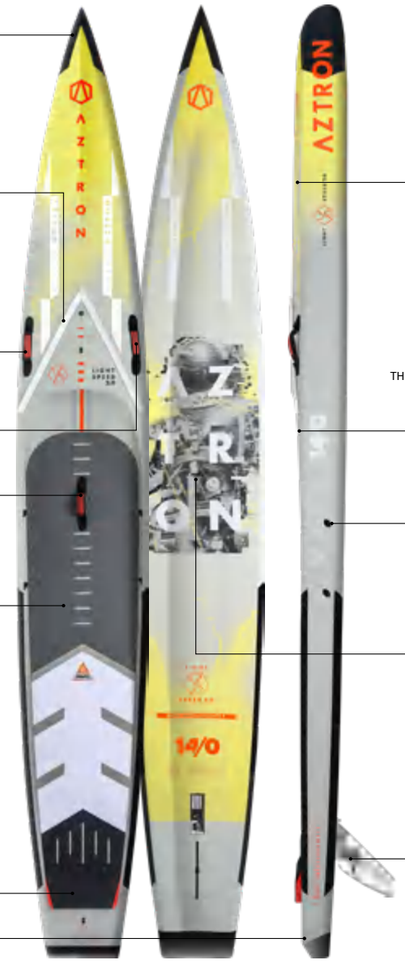

NARROW NOSE PROFILE WITH THINNER AND SHARPER DESIGN. OPTIMISED FOR SPEED IN FLATWATER AND SLICE WATER MORE EFFICIENTLY

EVA RACE DEFLECTOR TO LIMIT WATER ENTERING INTO THE DECK AND COCKPIT

2+1 RACE HANDLES CUSTOMIZED AND MULTIPLE HANDLE POSITIONS FOR BEACH STARTS

RECESSED DECK WITH SOFT TRACTION PADS FOR COMFORT AND STABILITY. FLAT DECK FOR RIDERS MOVING FREELY IN DIFFERENT POSITIONS

SQUARE TAIL WITH SLOPE AND TAIL KICK PAD FOR INSTANT TURNS

THICK PROFILE AVOIDS WATER SPLASHING INTO THE DECK AREA

THE HIGH AND SLOPED RAIL DESIGN RESTRICTS WATER FLOODING THE STANDING AREA AND GIVES FASTER ACCELERATION WHEN BUOY TURNS

SIDE DRAINAGE AT THE RAILS MAKES STANDING DRY FASTER AND HELPS PERFORMANCE

CUSTOMIZED ASTRONAUT PRINT

8.3" ASTRONAUT FIBERGLASS RACE FIN

The lightest race board you've been dreaming of has arrived. Redesigned with a new outline, this top-tier board enhances both speed and comfort for ultimate flat-water racing and long-distance paddling. The standing cockpit now features increased depth and high rails, providing superior stability and control. Additionally, the deck drainage system maximizes your speed. Race to win with the LIGHTSPEED 2.0.

ECLIPSE 11'0"

ALL-ROUND

With smooth paddling and effortless glide, the ECLIPSE Soft-Top SUP is your perfect all-round choice. Cruising on flat water is a pleasure with this board, while catching small waves is easy and fun. The ECLIPSE keeps the lightweight and durable Soft Top construction with a well-balanced and wide volume. The all-wrapped soft deck gives a comfort paddling experience, while the thin rail compares to air boards makes carving easy and smooth.

SURFSKATE TECHNOLOGY / MATERIAL AND STRUCTURE

	SHORT BOARD	LONG BOARD	LONG BOARD /TRAINING	DANCE BOARD
SETTING	PUMPING CRUISING BOWL	PUMPING CARVING CRUISING	CARVING CRUISING	CRUISING DANCING
DECK MATERIAL	MAPLE **MST (MAPLE SANDWICH TECH)** The Canadian Maple top and bottom veneer combined multiple birch layers in the middle creates a sandwich jam construction that delivers stiffness, power and dynamics that gives riders to snap the tail and carve at top speed.		100% MAPLE CARBON INLAY **100% CANADIAN MAPLE + CARBON INLAY** The SPACE 40 and OCEAN 36 are constructed with 7-ply 100% Canadian Maple deck. Canadian Maple is a strong and proven material used in the world's best skateboard. We source only the finest veneers found in Eastern Canada. The advanced 3K Carbon Inlay yields a super strong yet lightweight board with a custom stunning finish.	MAPLE **LONGBOARD OUTLINE WITH MST TECH** Canadian Maple deck on the top and bottom to delivers stiffness and power.
TRUCKS	 **MOTION TRUCK SYSTEM** It is a more simplified and unified PUspring structure, it offers directresponse in turning and pumping **ATOMIC TRUCK SYSTEM** A responsive, spring-loaded surfskate truck. It works by a spring inside it and by	 **SX 4.0 TRUCK SYSTEM** The SX 4.0 Truck features a set of spherical wave cams that translate axle rotation into increased force by compressing a solid compression spring. It allows for tight turns and incredible speed when cruising.		 **DANZA TRUCK SYSTEM** Setup on a lower angle baseplate, the DANZA Truck is specially designed for long board and dance board. With the reduced angle, it lowers agility in favor of stability, make it more suitable for freeriding and dancing.
DECK CONCAVE	DEEP Deep Concave with aggressive nose and U-shape concave sideways helps keeping your feet locked and best for top speed and performing tricks.	MELLOW The Long board collection include both Medium and Mellow Concave, which are less stiff but absorb more vibrations. They offer a smoother and comfortable ride.	MELLOW Mellow Concave is relatively flat. It makes easy footwork and is comfortable to ride, especially when cruising.	MELLOW Mellow Concave is relatively flat. It makes easy footwork and is comfortable to ride, especially when cruising.
TAIL/KICK	HIGH TAIL The shortboard collection comes with a surfy style high tail for surfing style movements, such as sharp turning and cutbacks.	MEDIUM TAIL TAIL KICK PAD The long board range from 31 to 42, it features a Medium raised angle tail. It is making every piece of asphalt feel like a wave. For STREET 31, FOREST 34, OCEAN 36 and SPACE 40, it even comes with an tail kick pad for your performance moves.		LOW TAIL The flat tail style of the WILD ROSE Danceboard promises larger platform for the cross steps. The generous deck area allows rider to do a little walk up and back.

7-LAYER CONSTRUCTION

All AZTRON surfskate boards are all constructed with 7-layer wood. It is built with either 100% Canadian Maple or MST (Maple Sandwich Tech) which has 5-layer birch with two layers of Canadian Maple for added strength and low flex.

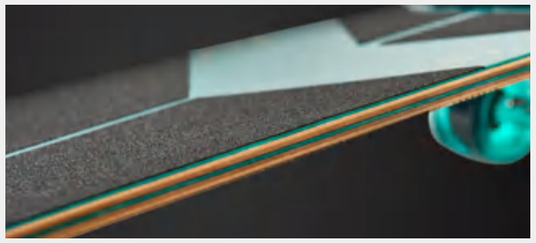

CARBON INLAY TECHNOLOGY

Carbon Inlay is another ideal budget friendly option to give the board with optimum flex and performance. Built with top quality carbon fiber sheet, the solid yet lightweight construction promises best weight to stiffness ratio and gives impressive performance.

100% CANADIAN MAPLE

Canadian Maple is a strong and proven material used in the world's best skateboards. We source only the finest veneers found in Eastern Canada. All AZTRON boards are built with the Canadian Maple timber and wrapped in amazing artwork and grip tape.

COLOR INSERT DECK

All AZTRON skateboards are customized with a single or double sandwich color insert ply for unique characteristics and maximum visual impact.

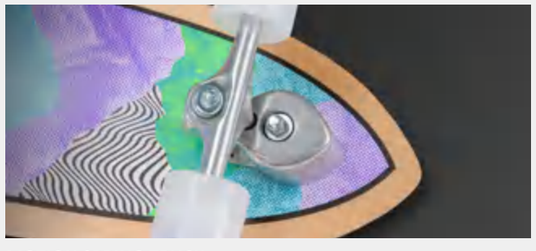

EVA TAIL KICK PAD

Inspired from surfboard, we integrated the soft EVA tail kick onto some of our boards. It features a deep diamond grooving foam pad to lock your toes and heel in quick turning and making stops. The tail kick also resulting in better control and drive. *Available for STREET, OCEAN, FOREST and SPACE.

SURFSKATE WHEELS

You can choose 70mm or 65mm for wheel options. The 65mm/78A smaller wheels with angled profile help you slide easier and move faster. These agile wheels work better for pumping and carving or transitions in the bowl. The larger 70mm ones are smoother and work better on the road.

MOTION SPRING TRUCK

The MOTION Spring is a responsive, sharp turning and surf carving machine. Built with a spring-loaded surfskate truck, it works by a spring inside it and by compression. It is perfect for riders to practice surf maneuvers such as bottom turns or cutbacks.

SX 4.0 TRUCK

The SX 4.0 truck features a set of spherical wave cams that translate axle rotation into increased force by compressing a solid compression spring. It allows for tight turns and incredible speed when cruising.

WHEELS

What the waves easily take care of takes years of dedication to be transfered to the concrete ground. AZTRON's classic sets of wheels comes in two different types: 65mm/78A and 70mm/78A. The 65mm wheels are designed for the tricks and techniques, while the larger 70mm wheels are created for effortless glides and sharper turns. With wonderful ground traction, these wheels replicate the surfing experience for greater fun!

DAWN 30

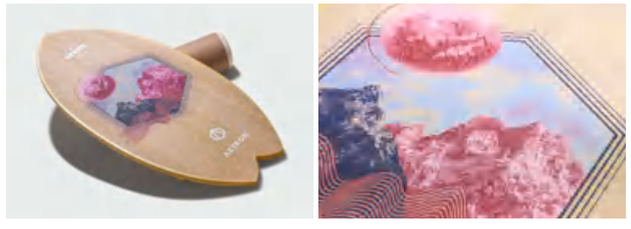

BALANCE BOARD / SHORT

Get prepared even when you are out of water. The AZTRON balance board will help you improve core strength, stability, coordination, and reaction time. DAWN is crafted from birch and with a fish tail design which refers to the surfboard. The collection is perfect for balance mode and with adjustable stops between the stops at the back of the board, so you can easily adjust the strength level to train up.

SPECS/

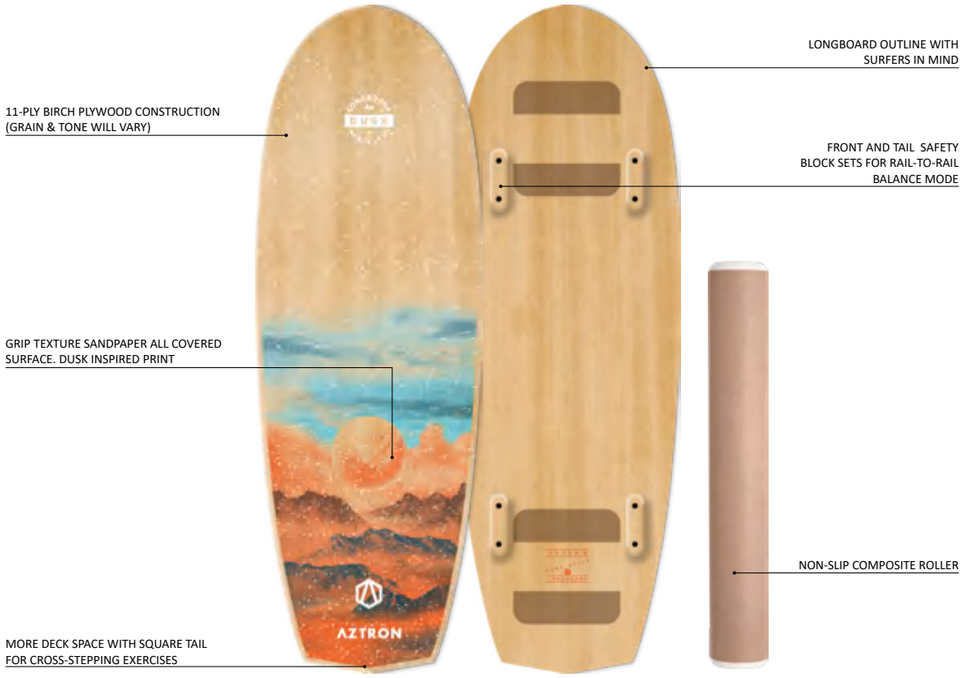

ITEM NO.	***AH-080B***
LENGTH	30" / 76 cm

PADDLES

BOLT

PRO RACE PRE-PREG CARBON FIXED PADDLE

The BOLT is a revolutionary paddle that fits all racers' need. 100% pre-preg carbon, CNC shaped high density PVC core blade. The pre-preg technology makes the paddle to achieve lowest weight, quickest response and ultimate in performance. The narrow concave V blades are powerful and super stable, offers in 75cm², 80cm² and 83cm² three sizes. They feature a generous ABS edge for protecion of your board and the blade. The fixed 1-piece shaft gives best strength-to-weight ratio, making the paddle extremely lightweight without compromising structural integrity.

HEAT

PRO RACE JUNIOR CARBON PADDLE

The HEAT performance junior paddle is built as a top racer paddle with the same Pre-preg carbon fiber construction as in our adult pro race paddles. With a smaller 16-26mm shaft diameter and a 72 sq.in deep concave blade, this paddle makes it easier for juniors to handle and glides through water smoothyly. Availabe in fixed or 2-section shaft, the all new HEAT delivers perfromance younger riders need to enjoy their time on the water while providing plenty of stoke.

GEAR BAGS

EXPLORER 30
WATERPROOF BACKPACK

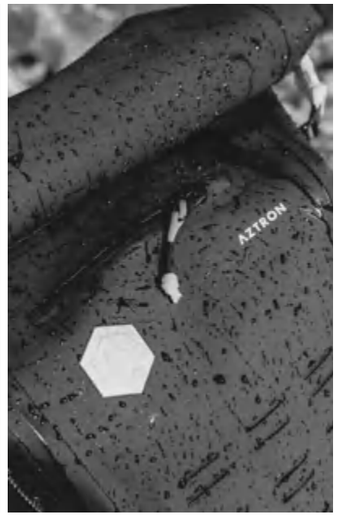

Take on any challenge and explore the world with the Explorer Waterproof Travel Backpack. The Explorer is built to handle any adventures-water sports, camping, hiking and weekend escapes. Made with TPU (Thermoplastic Polyurethane), this backpack ensures your belongings stay dry and safe, whether you're braving a heavy downpour or crossing rivers during your next adventure. The roll-top closure and reinforced base keep your gear dry and secure, while external water-resistant pockets give quick access to essentials. Inside, a removable padded laptop sleeve and ergonomic back panel make it versatile enough for both outdoor missions and everyday carry.

ATLAS ROLLER BAG 120L

The ATLAS 120L Roller Bag is the ideal companion for your SUP adventures. Aside from the seasonal color and graphics makeover, this bag now features a sturdier wheely structure for smoother transportation. Its spacious interior fits all of your boards, pumps, paddle gear, with separate compartments that help you organize and protect your belongings. Plus, the front zipper bag is a handy addition for storing your essentials. Embark on your journey to new horizons with the upgraded ATLAS Roller Bag!

WETSUIT MAINTENANCE GUIDE

KEEP YOUR WETSUIT PERFORMING ITS BEST AND EXTEND ITS LIFESPAN WITH THESE SIMPLE CARE TIPS:

1. Rinse after every use

- Always rinse your wetsuit thoroughly with fresh, cool water after each use.
- This removes salt, sand, chlorine, and debris that can damage neoprene over time.

2. Dry properly (avoid direct sunlight)

- Turn your wetsuit inside out to dry the interior first.
- Hang it in a shaded, well-ventilated area - direct sunlight can cause fading and material breakdown.
- Avoid hanging it by the shoulders when wet (it can stretch); fold it over a thick hanger or rod.

3. Use wetsuit shampoo occasionally

- Wash with a mild wetsuit shampoo or neoprene cleaner every few uses to remove odor and bacteria.
- Never use harsh detergents, bleach, or hot water.

4. Store it flat or loosely hung

- Store in a cool, dry place away from direct sunlight or heat.
- Avoid folding sharply - it can create permanent creases.
- If hanging, use a wide hanger to maintain shape.

5. Avoid sharp objects & chemicals

- Keep your wetsuit away from sharp surfaces that may tear neoprene.
- Do not leave it in a car or near heaters - heat can degrade the material.

H2O
FLOATING
Made of TPX (Polymethylpentene) is an ultra-light,
low-density polymer that allows the sunglasses to float on water.
UV
400
Blocks 100% of UVA and UVB rays, shielding your eyes from harmful ultraviolet radiation.
Our Category III Lenses are built for bright, sun-drenched conditions.
POLARIZED
INDEX
We applied Polarized Lenses to reduce glare from reflective surfaces.
These lense enhance clarity, improve contrast and provide more comfortable
visions-perfect for outdoor sports and water activities.

EYEWEAR

SUNCATCHERS

SOLAR

SPLASH. PLAY. SHINE. SUNGLASSES THAT STAY AFLOAT. Let kids dive into sunny adventures without worry. The newest floatable sunglasses are designed for endless beach days, outdoor play and water fun.

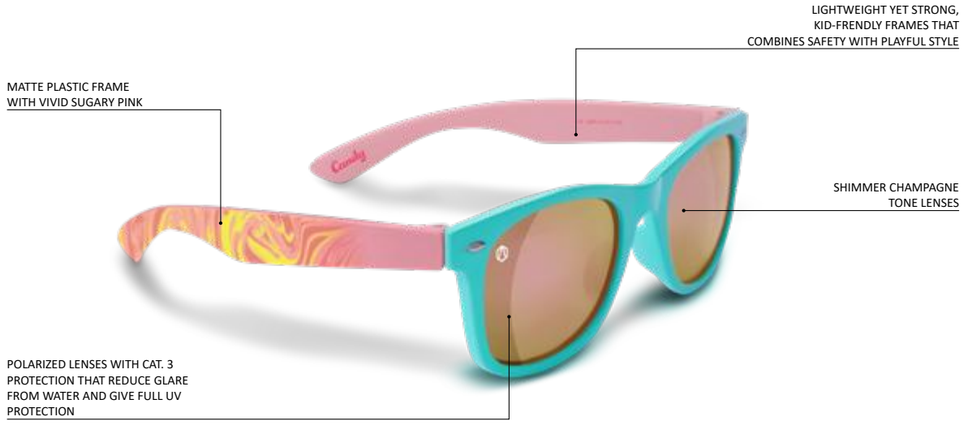

MADE FOR SUNNY ADVENTURES. FROM BEACH TO BACKYARD.

SHINE

CANDY

KIDS EYEWEAR / CHEERFUL PINK

Sweet, playful and cheerful! The Candy and Solar sunglasses are designed for kids aged 5 to 10 years old who love outdoor adventures and sunny days! The bubblegum inspired Candy Pink brings playfulness to girls while the Solar Grey with graffiti adds a cool and energetic pop to the boys. Both sunglasses spark creativity with vivid and colorful design. Built with lightweight TPX, these sunglasses are made to stay afloat on water, so kids won't lose them during pool time, beach trips or water sports. Lenses block 100% of UVA and UVB rays, keeping little eyes safe from harmful sun exposure.

LENS TECHNOLOGY

THE AZTRON SUNGLASSES TECHNOLOGY IS DESIGNED TO FILTER OUT 99% OF REFLECTED GLARE MINUS THE HAZE AND DISTORTION.

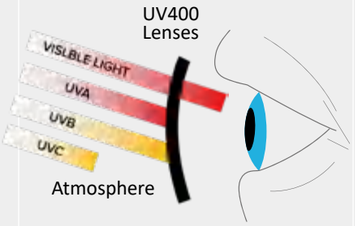

COMPLIMENTARY CASE

Each pair of AZTRON eyewear is packaged in a protective and portable sunglass case

UV PROTECTION

UV400 indicates the lenses block all light rays with wavelengths up to 400 nanometers. This includes 100% UVA and UVB rays, the harmful rays from the sun that can cause eye damage over time.

PROTECTION INDEX

Category 3 (strong sunlight) allows a luminous transmittance of 8%-18%, optimum for the beach and the sea. Let only the “right” light in.

CONDITION	CATEGORY	TRANSMISSION
	0	80 - 100%
	1	43 - 80%
	2	18 - 43%
	3	**8 - 18%**
	4	3 - 8%
