TECHNOLOGY

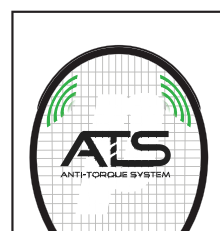

SETTING THE STANDARD AS THE EXCLUSIVE RACQUET BRAND UTILIZING TEXTREME TECHNOLOGY.

ATS
ANTI-TORQUE SYSTEM

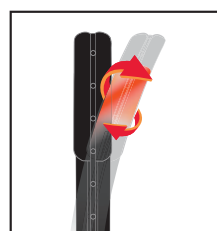

The new Anti-Torque System (ATS) **TeXtreme** X **Twaron** at the 2 & 10 o'clock positions to help reduce upper hoop torsions. This results in increased power and unparalleled ball pocketing.

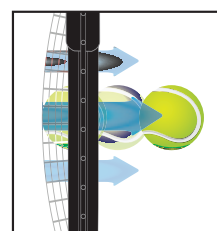

SHAFT

HOOP

**TORQUE
REDUCTION**

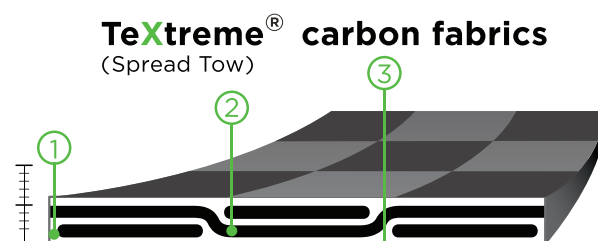

**INCREASED
PROPULSION**

TeXtreme Spread Tow woven laminates are developed with a thinner structure and straighter carbon fibers to create a composite material that is 20% lighter in weight with improved stiffness. Positioning **TeXtreme** in the shaft and lower hoop with a 45-degree orientation reduces frame twisting by up to 25%. The result is unparalleled stability and plow through on impact providing more Power AND Control to your shots.

POWER-RAIL

Additional stiffness constructed in lower part of the hoop to reduce lateral "twitch" deformation and raise sweet spot of highest rebound

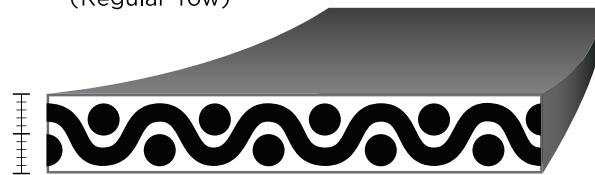

① The Spread Tow structure makes it possible to achieve thinner laminates.

② Straighter fibers with reduced crimp optimize and strengthen the composite composite.

③ Lower crimp reduce the amount of excess plastic, thereby minimizing weight.

Conventional carbon fabrics
(Regular Tow)

THIS TECHNOLOGY RESULTS IN:

IMPROVED CONTROL | ENHANCED POWER | INCREDIBLE FEEL

Now with added **Twaron** Filaments for extra vibration dampening to give the most comfortable version of **TeXtreme** ever!

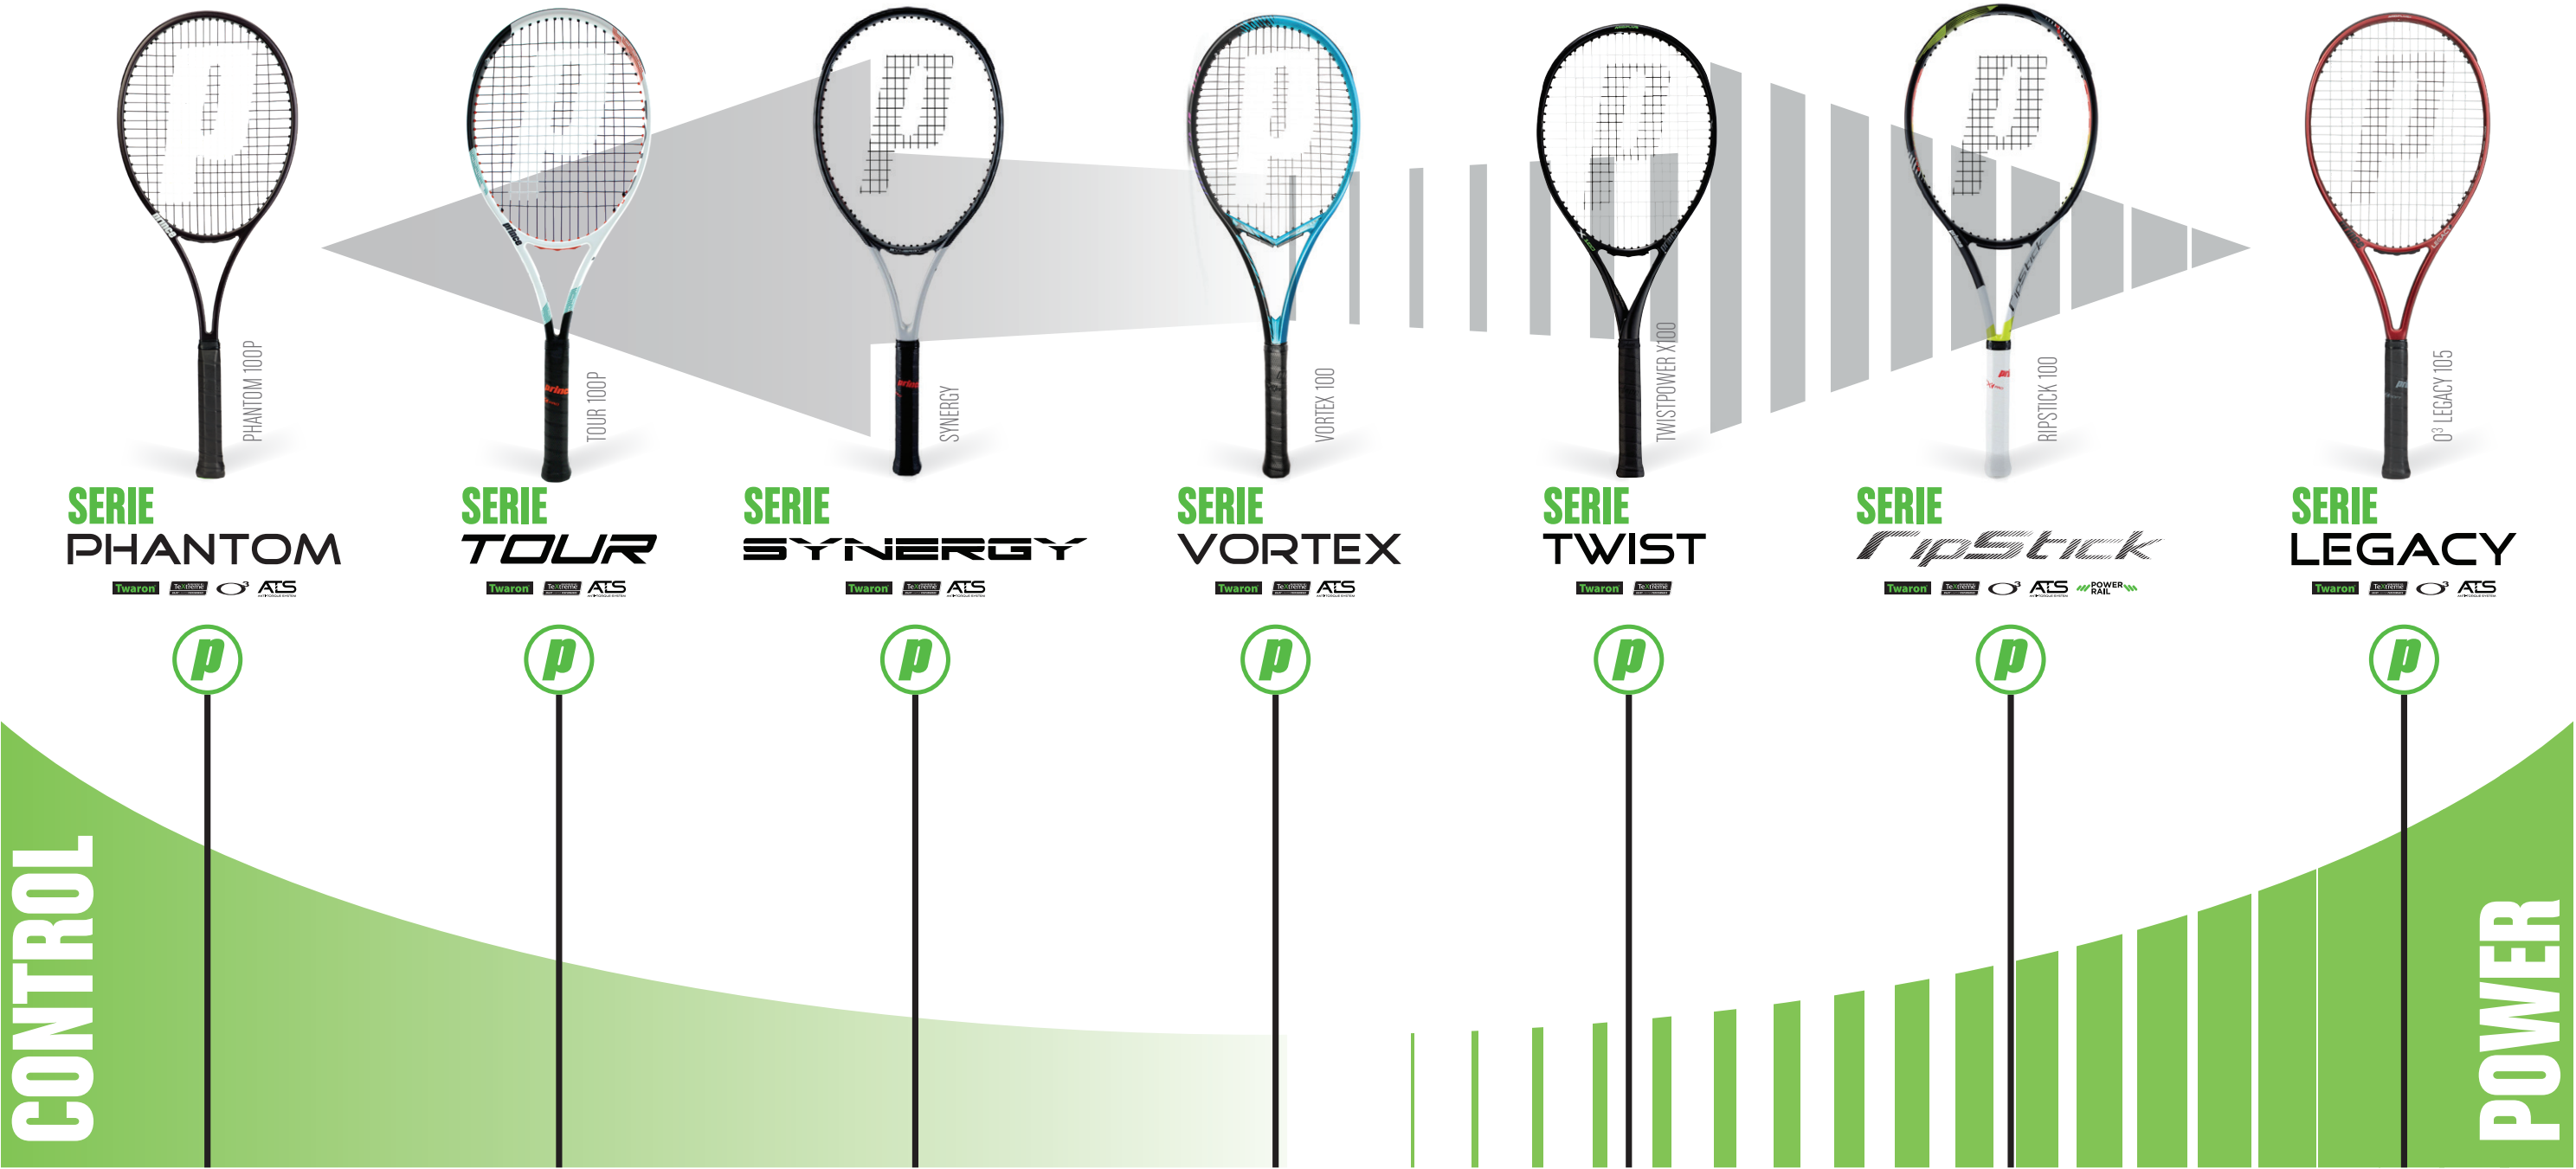

Twaron

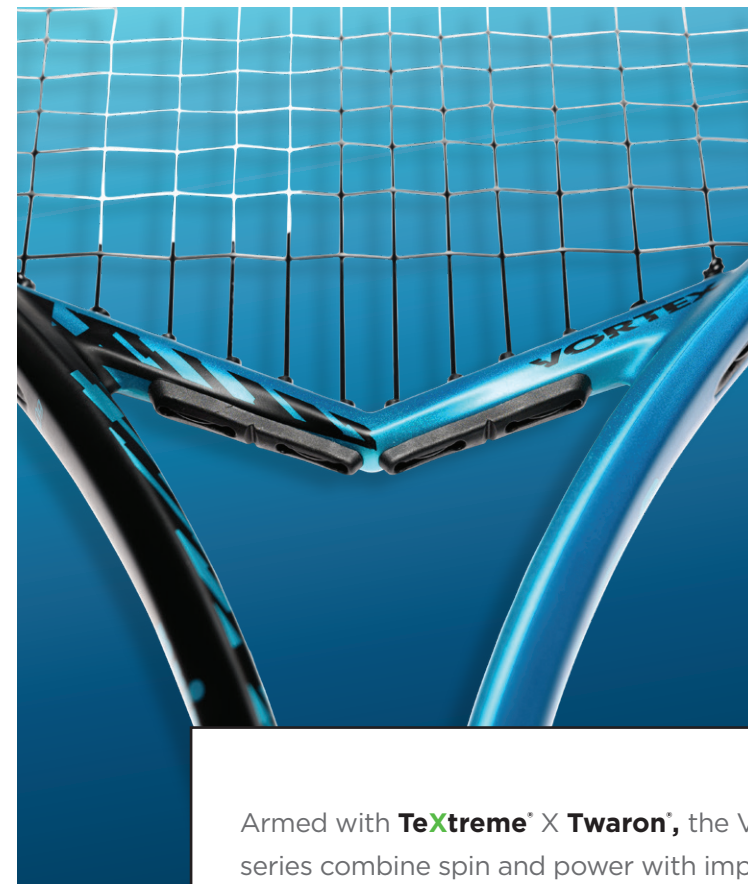

KEY FEATURES

- Built with **TeXtreme**, an advanced, super thin carbon fiber fabric that maximizes the strength-to-weight ratio
- This proven technology is engineered into the shaft of the racquet to maximize racquet stability
- 45-degree box weave, carbon fiber pattern allows for increased stability and enhanced hitting feeling

WHICH *prince* RACQUETS SUITS YOUR GAME ?

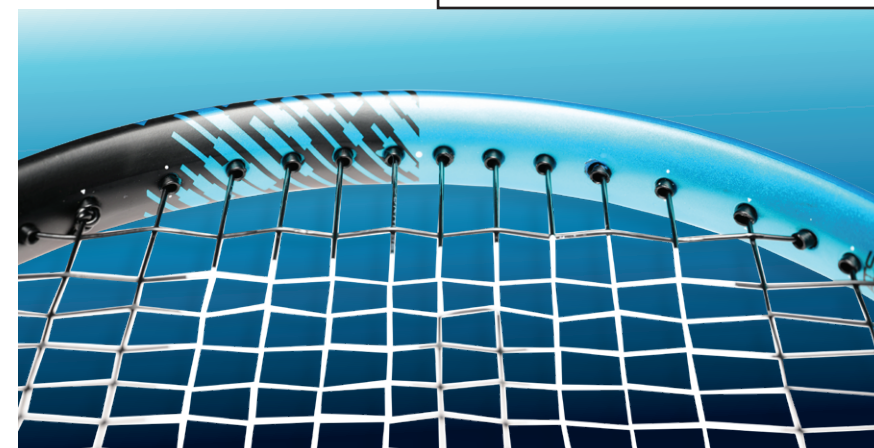

VORTEX

Armed with **TeXtreme**® X **Twaron**®, the Vortex series combine spin and power with impressive feel and touch. Featuring a unique 14x21 string pattern, the Vortex rewards full swings with a predictable trajectory and spin-friendly precision.

Extended bridge:

Design for elongated main strings (to improve spin)

SPIN & CONTROL

TOUR

The Prince Tour series is distinctive for its balance of features. It borrows some of the control and feel from the Phantom series and blends it with the power and spin found in the Beast family. These models benefit from **TeXtreme** X **Twaron**, a material technology that delivers a stable, low-vibration response.

Continuing with the 3rd generation of this franchise, taking the best parts of the previous generations (gen.1 pocketing/comfort, gen.2 power) and improving overall playability.

ULTIMATE POWER

You like to overpower with huge shots that finish the point before it even gets started. You are addicted to the sensation of raw explosive power that blows past your opponent before they even get a chance to move. Crush your opponent with ultimate power. One shot winning power.

CTS – Aggressive CTS design, built for power particularly on serve and return. Evolution of O-ports – Most dramatic O-ports ever constructed. Power rail – Additional stiffness constructed in lower part of the hoop to reduce lateral “twitch” deformation and raise sweet spot of highest rebound.

RIPSTICK 300

ITEM NUMBER	HEADSIZE	UNSTRUNG WEIGHT	BALANCE	SWING WEIGHT	LENGTH	STRING PATTERN	CROSS SECTION	POWER LEVEL	GRIPS

RIPSTICK 280

ITEM NUMBER	HEADSIZE	UNSTRUNG WEIGHT	BALANCE	SWING WEIGHT	LENGTH	STRING PATTERN	CROSS SECTION	POWER LEVEL	GRIPS
7T53P	100in/645cm ²	280g/9.9oz	34cm/13.4in 1 pts. HL	288	27in/68.6cm	16 x 18	27-22 mm	1200	1-4

RELENTLESS POWER

Destroy your opponent with penetrating power.

Aerodynamic textured design (turbulent air like golf ball). Despite heavier weight and swingweight than “generic tweener” frames, the sculpted texture on the leading edge of frame helps to produce a layer of turbulent air at surface and allow for quicker movement through the air.

The uniquely developed 18x18 string pattern has reduced cross strings to increase the amount of ball pocketing but additional main strings to prevent trajectory control issues. Result is great feel and flatter penetrating ball flight CTS. Also designed with CTS (although less dramatic than Ripstick) in order to take advantage of additional swingweight for heavy punishing shots (particularly on serve/return or on the stretch).

SYNERGY

TWIST REVOLUTIONARY TECHNOLOGY

Developed in Japan, the Twistpower technology brings truly game changing performance benefits for beginners to high level players thanks to it's unique asymmetrical shaft shape.

The result is the first ever racquet that brings different performance benefits to forehand and backhand shots. More control for your forehand, more power for your backhand. More victories for you.

PHANTOM

The **TeXtreme**® Phantom Series, designed in collaboration with Tour professionals, is the ideal line for the modern aggressive player. Providing an incredible amount of touch and control, the Phantom racquets still have the power needed to hit explosive winners. The combination of **TeXtreme**® and a super thin CTS construction provides a never before experienced playability.

BAG COLLECTION

Prince bags are designed and developed to match the varying demands of players. The moment you start to prepare to play, you want to be confident that equipment won't let you down. Practicality and functionality are at the forefront of the bag design process and players can have the confidence they need and the performance they demand. The newest collection raises the bags to new levels with elevated materials and a new design that features reflective logos

TOUR EVO THERMO 12

NEW

- Brand new 12 Pack silhouette
- U-zip top opening for full access to all internal pockets and items
- Full thermal compartment
- Velcro locker-style compartments
- Internal and external organizational pockets
- Removable footwear bag

TECHNOLOGY

TeXtreme REINFORCED BY®

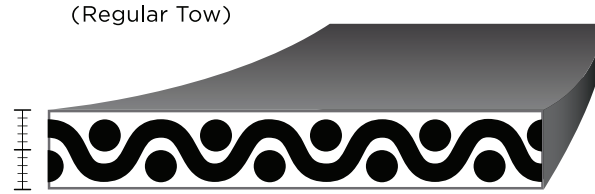

TeXtreme® spreadtow woven laminates are developed with a thinner structure and straighter carbon fibres to create a composite material that is 20% lighter in weight with improved stiffness.

Positioning **TeXtreme**® at a 45° orientation at 2/10 positions on the hoop reduces the torsional deformation of the racquet head at these critical zones by up to 25%. This results in superior torsional stability at impact creating a bigger sweetspot for unparalleled power, response & accuracy for all squash players.

TeXtreme® carbon fabrics
(Spread Tow)

Conventional carbon fabrics
(Regular Tow)

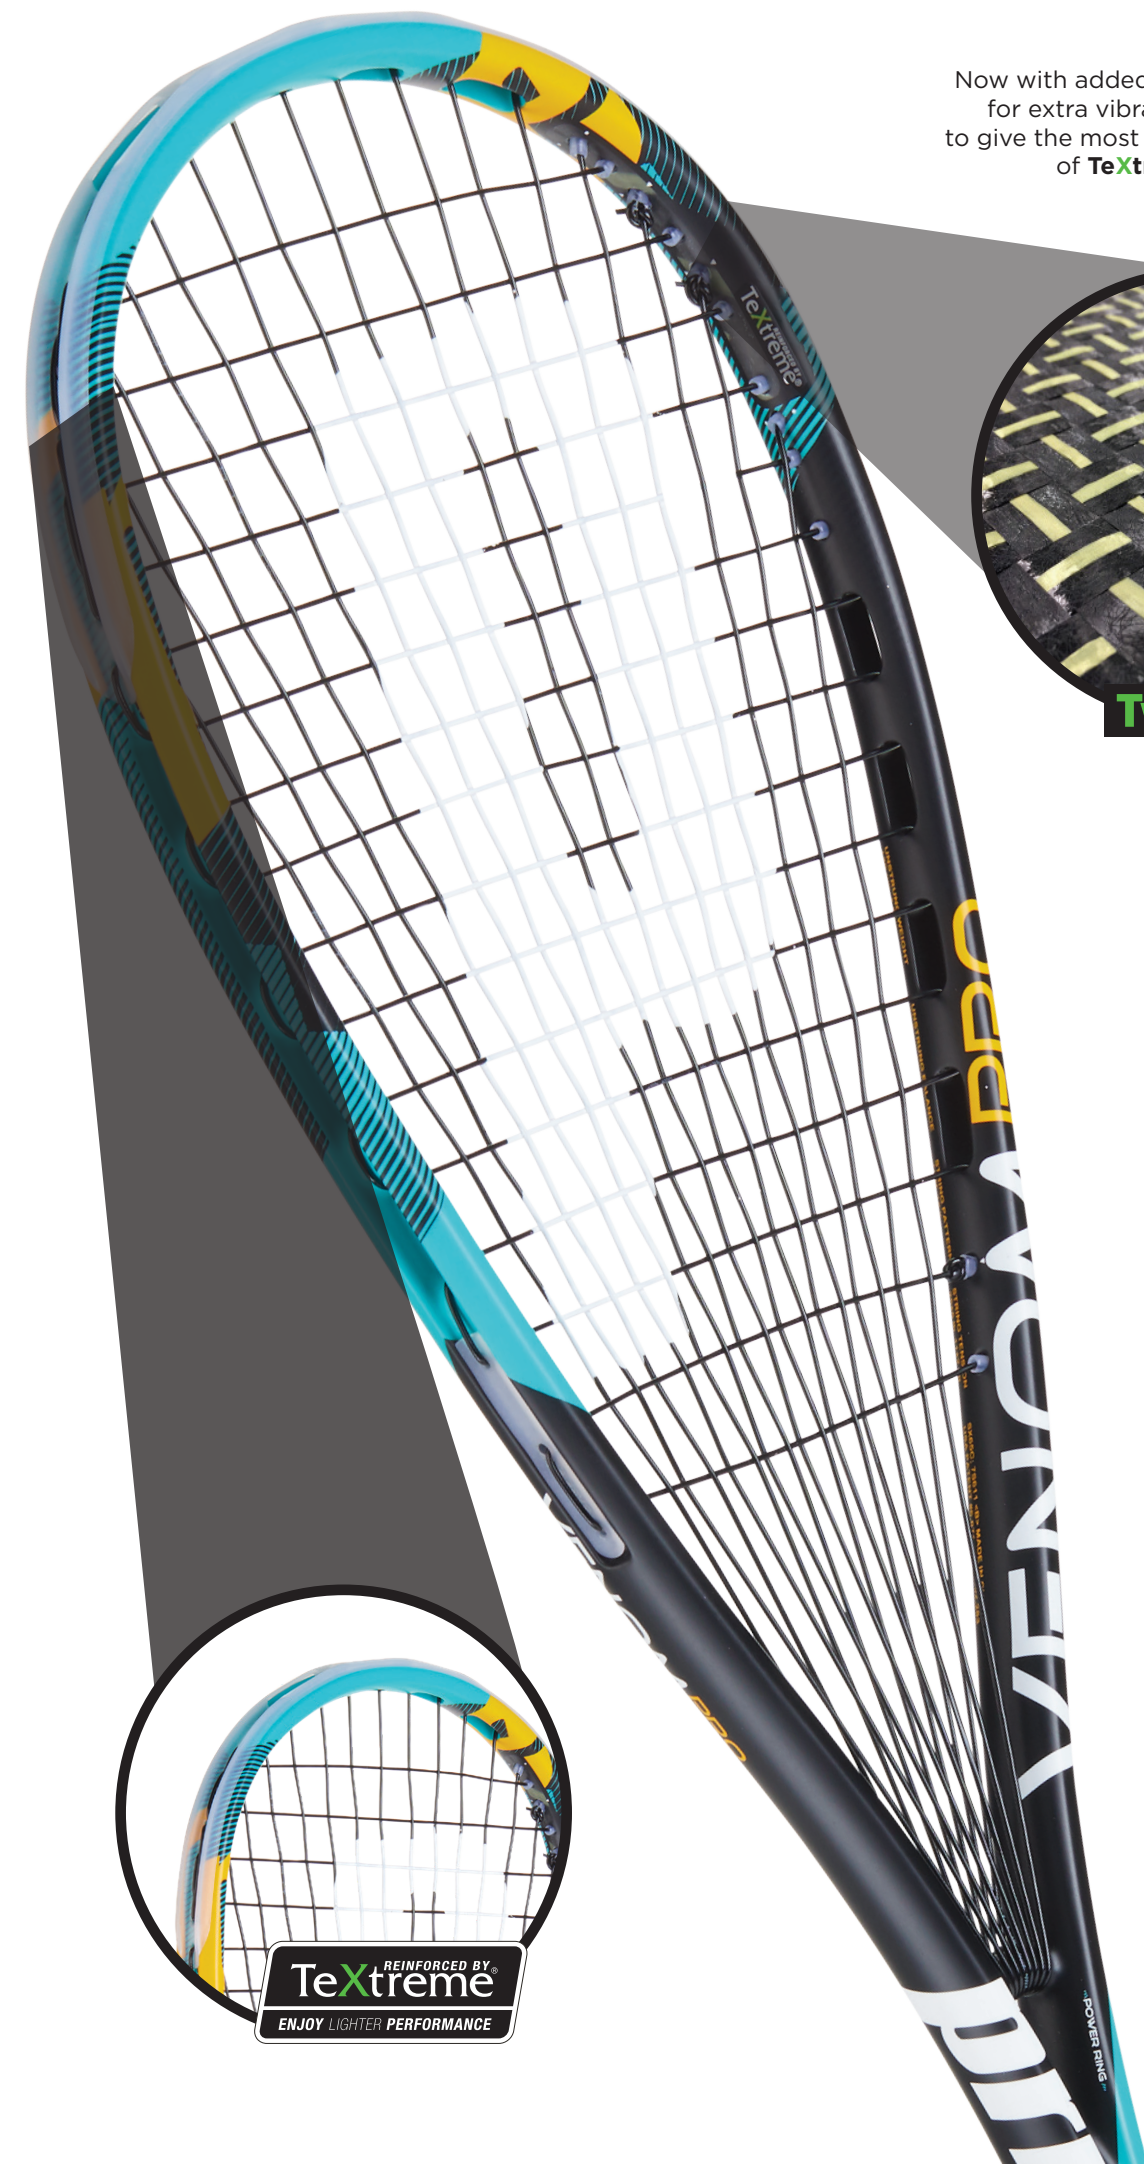

- ① The Spread Tow structure makes it possible to achieve thinner laminates.
- ② Straighter fibers with reduced crimp optimize and strengthen the composite composite.
- ③ Lower crimp reduce the amount of excess plastic, thereby minimizing weight.

Now with added **Twaron**® Filaments for extra vibration dampening to give the most comfortable version of **TeXtreme**® ever!

Twaron®

MORE TECH

prince

	Re-engineered frame with open string pattern helps provide more power from the back of the court while giving more control and 'bite' on the ball.
 POWER RING	An inverted "ring" in the throat of the frame creates longer main strings of uniform length for enhanced power across the entire string bed. A grommetless throat increases frame durability and stiffness.
	Large O-ports at 12, 3 and 9 o'clock positions on the frame significantly reduce aerodynamic drag increasing swing speed by 24% and enlarging sweet spot size by up to 59%.
	EXO3 racquet design utilizes large holes and string suspension to deliver racquets with the largest hitting area on the market.
	Air Quadrants in the handle reduce vibration and shock to the hand from the racquet.
